Overview

In accordance with the *Emergency Medical Services Transportation Act*, Rhode Island General Law §23-4.1-3(e), the Rhode Island Department of Health's (RIDOH) Center for Emergency Medical Services (CEMS) releases its *2017 Annual Report* to Governor Gina M. Raimondo and the leadership of the General Assembly.

CEMS is located within the Division of Preparedness, Response, Infectious Disease, and Emergency Medical Services (PRIDEMS). The core functions of CEMS include licensure of emergency medical services (EMS) practitioners and ambulance services, inspection of ambulances, development of protocols for emergency medical treatment in the pre-hospital setting, management of statewide EMS data, establishment of educational requirements, and investigation and resolution of complaints.

CEMS works in collaboration with the Ambulance Service Coordinating Advisory Board (ASAB) and its subcommittees to develop statewide policy and protocols. In 2017, a significant revision of the [Rhode Island Statewide EMS Protocols](#) was completed and was implemented March 1, 2017. The new protocols incorporate evidence-based, data-driven treatment modalities.

CEMS staff, in conjunction with the PRIDEMS medical director, began the process to revise the *Rules and Regulations Relating to Emergency Medical Services* [R23-4.1EMS], both in format and content, pursuant to the *Administrative Procedures Act* mandate.

The Chief of CEMS continued to serve on the Governor's Overdose Prevention and Intervention Task Force, and CEMS provided the Task Force and Prevent Overdose RI with multiple data points for analysis.

Significant progress was made to upgrade and migrate Rhode Island's EMS Information System (RIEMIS) from the National EMS Information System (NEMSIS) v.2.2.1 standard to version 3.4. Rhode Island implemented a statewide requirement for electronic, patient care record (ePCR) reporting in 2014, and all licensed EMS agencies are in compliance. In 2017, Rhode Island submitted v.3.4-compliant data to NEMSIS and adoption of this standard is projected to reach 100% in 2018. The NEMSIS v.3.4 standard aligns EMS data with hospital data by utilizing the US ICD-10-CM coding. The v.3.4 system has the capability to merge hospital outcome data (discharge, admission) with RIEMIS data to create a more comprehensive view of an emergency event. CEMS collaborated with the health informatics team at the Executive Office of Health and Human Services (EOHHS) to initiate a project to upload EMS electronic patient care records to the State's Health Information Exchange (HIE). The project is scheduled to be completed in 2018, and the next goal will be to return patient and hospital outcome data into the EMS report. Funding would need to be identified to move forward with such a project.

The concept of Mobile Integrated Health/Community Paramedicine increased in popularity on the national level, and its implementation in Rhode Island gained momentum. Several municipalities and ambulance services have expressed interest in these types of programs, which are designed to enhance patient care in the communities by expanding the role, but not the scope of practice, of EMS practitioners. By partnering with primary care physicians and hospitals, EMS practitioners can play a role in reducing the number of unnecessary hospitalizations. Pilot projects began in 2017 after the revised EMS protocols were enacted. Learn more about this topic at the [online resource page](#).

CEMS had the opportunity to work with internal and external partners to shape healthcare policy and improve delivery of care to all Rhode Islanders. CEMS staff are active participants of the Governor's Overdose Prevention and Intervention Task Force, the Stroke Task Force, the HeartSafe Communities Project, the Drug Overdose Prevention and Rescue Coalition, the Rhode Island Children's Cabinet and the Child Death Review Team. Staff regularly attended meetings of the Department of Transportation's (RIDOT) Traffic Records Coordinating Committee because CEMS provides data for the Fatality Analysis Reporting System (FARS). CEMS staff were also contributors to the Rhode Island Emergency Management Agency's (RIEMA) work group to revise the state's Mass Casualty Plan and Mutual Aid Plan.

On the national level, three staff were active members of the National Association of State EMS Officials (NASEMSO), serving in leadership roles and on the Association's Board of Directors.

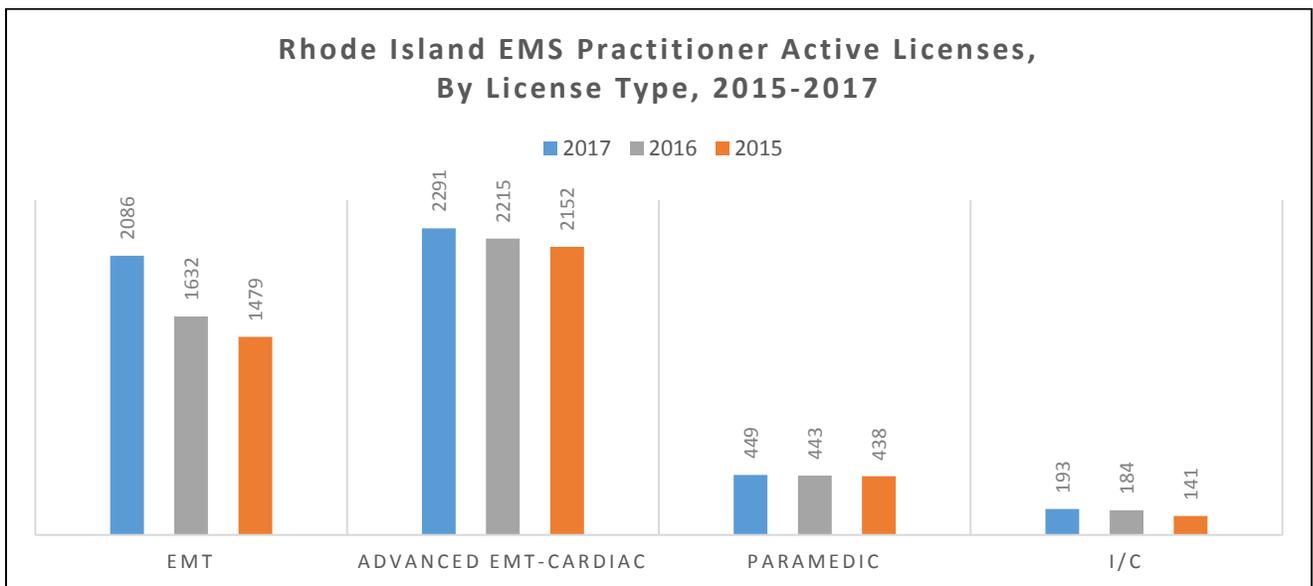

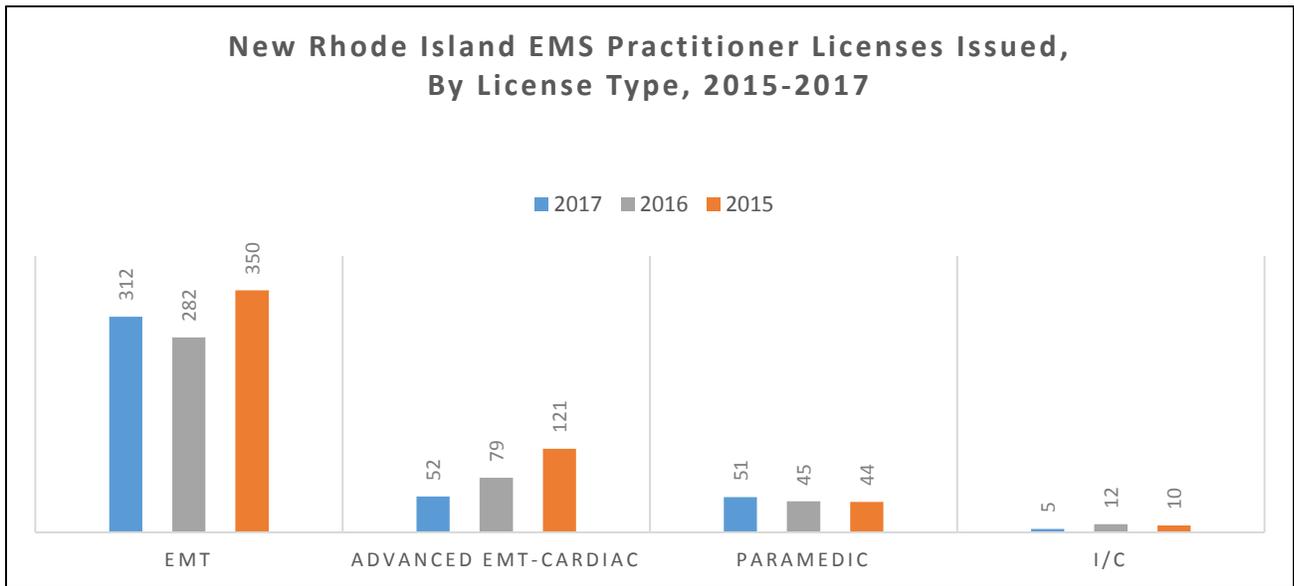

- EMS for Children Program Director Carolina Roberts-Santana was the Pediatric Emergency Care Council Chair and the New England Regional Lead.
- CEMS Physician Medical Consultant Kenneth Williams, MD, chaired the Medical Directors Council.
- CEMS Chief Jason Rhodes was elected chairperson for the East Region.

Rhode Island was selected to host the Association's 2018 annual meeting, which will occur May 20-24th in Providence at the Omni Hotel.

In May, National EMS Week was celebrated with the third annual Rhode Island EMS Awards Ceremony. EMS practitioners were honored for their dedicated service. Honorees, who were nominated by their peers and selected by CEMS staff, were:

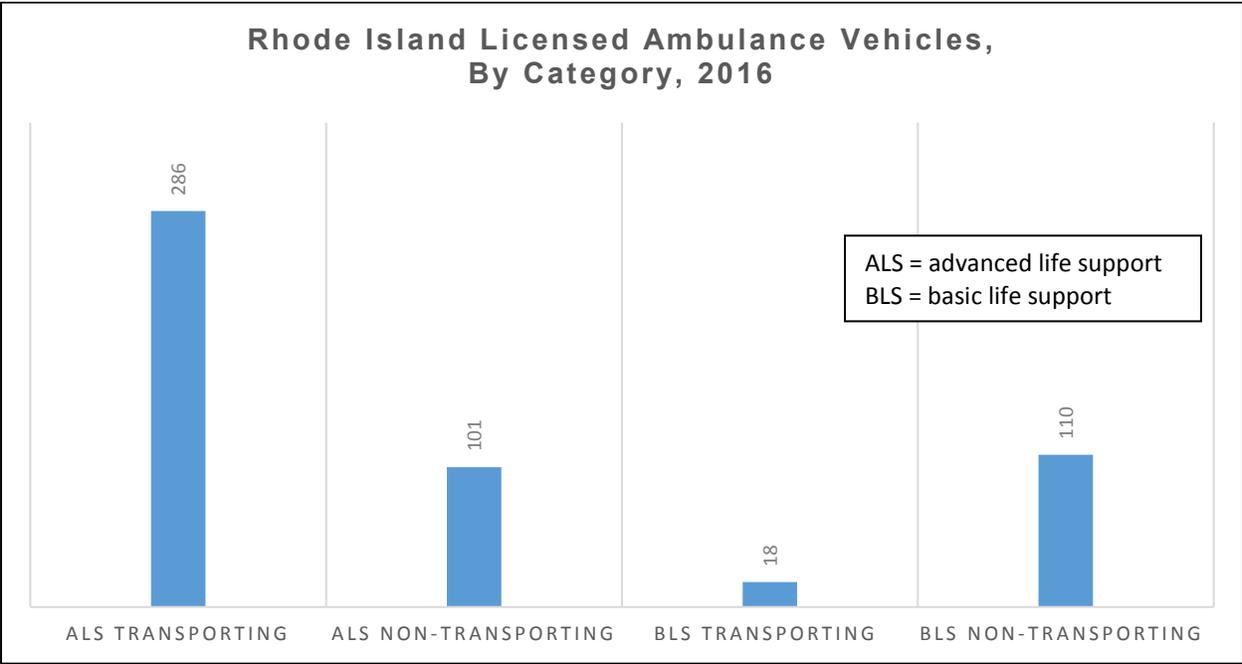

- Joseph Plocica, Tiverton Fire Department; EMS Coordinator of the Year
- Paul Silva, Chepachet Fire Department; EMS Coordinator of the Year
- Patrick Hawkins, Exeter Fire District; Volunteer ALS EMT of the Year
- William Paul, Foster Center Fire Department; Volunteer BLS EMT of the Year
- Richard Mosher, Westerly Ambulance Corps; Career EMT of the Year
- William LaBarre, North Smithfield Fire Department; Special Award
- Leo Kennedy, retired Chair of the Ambulance Service Coordinating Advisory Board
- John Pliakas, Ambulance Service Coordinating Advisory Board, primary author of the *Rhode Island Statewide EMS Protocols*

Licensing Statistics

Rhode Island Licensed Ambulance Services, By Category, 2017	
Category	Number
Municipal (total)	28
<i>Fire Department, transporting</i>	25
<i>Independent EMS, transporting</i>	3
Fire district (total)	20
<i>Transporting</i>	12
<i>Non-transporting</i>	8
Private, non-profit, community-based (total)	18
<i>Transporting</i>	12
<i>Non-transporting</i>	6
Private, for-profit (total)	9
<i>In-state home office, transporting</i>	3
<i>In-state home office, non-transporting</i>	1
<i>Out-of-state home office, transporting</i>	5
College/University (total)	7
<i>Transporting</i>	2
<i>Non-transporting</i>	5
Hospital-based	1
State assets, non-transporting	3
Federal fire department	1
Industrial, private, non-transporting	1
Total licensed ambulance services	88

A transporting service has at least one ambulance capable of transporting a patient. A non-transporting service (fire engines, sports utility vehicles) has licensed apparatus that are equipped with EMS supplies.

Based upon the vehicle class (transporting or non-transporting, basic life support, or advanced life support), each licensed ambulance is required to carry, at a minimum, equipment as outlined in the [Rhode Island Emergency Medical Services Ambulance and Ambulance Service Inspection & Licensing Manual](#). Advanced life support vehicles refer to those vehicles that are staffed by Advanced EMT-Cardiacs and/or Paramedics.

EMS Education

The [Rhode Island Curricula and Standards for EMS Educational Programs](#) were revised in 2015. Key elements of the revisions included using the Advanced EMT guidelines from the *National EMS Education Standards* as the foundation for Advanced EMT-Cardiac education and using the NREMT Advanced EMT practical skills examination as an independent evaluation. CEMS continues to utilize these curricula standards.

CEMS developed a state-level accreditation process in 2014 to provide oversight for educational programs that operate in the state. In 2016, CEMS staff reviewed applications and performed several site visits to verify that educational institutions met the criteria set forth in the [Rhode Island EMS Educational Programs Accreditation Standards and Guidelines](#). As of December 31, 2016, there were 14 educational institutions that were authorized to conduct initial training courses in Rhode Island. All paramedic education programs are required to be accredited by, or hold a letter of review from, the [Committee on Accreditation of Educational Programs for the EMS Professions](#) (CoAEMSP). Any paramedic seeking to take the [National Registry of Emergency Medical Technicians](#) (NREMT) examinations is required to have completed training at an accredited institution. As of December 31, 2017, there were no educational programs in the state that were fully accredited by CoAEMSP. Two programs held a letter of review and one program voluntarily withdrew its accreditation application.

Appendix B contains the *2017 Rhode Island State Report* from the NREMT. As of December 31, 2017, the Training Coordinator position in CEMS remained vacant; however, CEMS will continue to seek ways to increase applicants' examination pass rates and will do so in conjunction with the Educational Standards committee of ASAB.

Data Management

RIEMSIS transitioned to a [National EMS Information System](#) compliant (NEMSIS) data system and used ImageTrend as its vendor. The use of a fully electronic system means that all licensed EMS agencies provide *only* electronic patient-care reports (ePCR), and those ePCRs are uploaded to the state data repository on a regular basis. CEMS worked with the Data Management Committee of the Ambulance Service Coordinating Advisory Board (ASAB) for the migration to the most current version of RI EMSIS (v.3.4), which is expected to be complete in 2018.

Rhode Island provides quarterly, de-identified data uploads to NEMSIS, which, in turn, makes that data accessible to other states in a dashboard format via a web portal. In 2017, CEMS formalized an agreement with the National Collaborative for Bio-Preparedness (NCBP), a venture funded by the US Department of Homeland Security, to also provide NEMSIS-compliant data. In turn, the NCBP analyzes CEMS data and presents it in a dashboard for bio-weapon syndromic surveillance, opioid use disorder, motor vehicles crashes, and EMS performance measures.

In addition, CEMS provides data to a number of internal and external partners, including:

- National EMS Information System
- National Collaborative for Bio-Preparedness
- The Governor's Overdose Prevention and Intervention Task Force
- Prevent Overdose RI
- RIDOT
- The Center for Disease Control and Prevention (CDC)
- Office of State Medical Examiners
- RIDOH's Violence and Injury Prevention Program.

A report of common EMS data points from the RIEMSIS is available in Appendix C.

Compliance Investigation

A significant responsibility of CEMS is to investigate complaints which may result in disciplinary action. In 2017, EMS investigated 19 complaints against licensed EMS practitioners, EMS services, or ambulances.

The nature of complaints received included notification of a licensee's arrest for felony or misdemeanor counts, violations of the [Rules and Regulations Relating to Emergency Medical Services \[R23-4.1EMS\]](#) or [Rhode Island Prehospital Care Protocols and Standing Orders](#), medication errors, failing to transport to the proper emergency facility, misapplying protocols, and patient-care issues.

Complaints originated from the general public, patients and/or patients' families, other licensed healthcare providers, CEMS, and the Office of State Medical Examiners. CEMS investigated each complaint filed and also accepted anonymous complaints. Any disciplinary actions that were taken against an EMS practitioner, an EMS vehicle, or an EMS service agency as a result of a complaint investigation were posted on RIDOH's [disciplinary actions website](#).

Collaboration with Internal Partners

CEMS supports the overall mission of RIDOH by working in collaboration with other Centers and Programs and has forged lasting working relationships. CEMS staff was available to fulfill staffing needs for RIDOH's Center of Emergency Preparedness and Response (CEPR) during departmental incident and emergency responses. In addition, CEMS staff completed training, including forklift operator training and Incident Command System operations training.

In 2017, the CEMS Chief co-chaired RIDOH's Health and Safety Committee and authored the emergency evacuation plan for RIDOH's Cannon Building. Also, CEMS staff provided first aid to visitors or other staff who were ill or injured and conducted CPR and first aid training for RIDOH employees.

Emergency Medical Services for Children

Program Overview

The Emergency Medical Services for Children Program (EMSC) is designed to reduce child and youth mortality and morbidity resulting from severe illness or trauma and is funded by a federal Health Resources and Services Administration (HRSA) grant. The program aims to:

- Develop and implement new statewide EMS treatment protocols that emphasize pediatric emergency care, including support for EMT education and training programs;
- Develop programs for parents and communities, which:
 - Identify and reduce barriers to emergency care for children;
 - Provide information relating to health promotion and injury prevention; and
 - Focus on recognition of emergencies and improving access to, and appropriate use of, the local EMS systems; and
- Provide periodic case reviews and follow-up to EMS personnel in pediatric cases.

EMSC is a national initiative, established in 1985, to reduce childhood death and disability due to severe illness or injury. Since its inception, it has raised awareness among healthcare professionals, EMS and trauma system planners, and the general public that children respond differently – physically, emotionally, and psychologically – to illness or injury than adults do. In Rhode Island, EMSC has had numerous initiatives in the last 10 years; however, a consistent goal has been the development of pre-hospital and acute-care provider training. EMSC has been involved in establishing EMS guidelines and protocols, equipment lists, and other clinical care resources.

EMSC Performance Measures

To measure the effectiveness of federal grant programs, HRSA requires grantees to report on performance measures related to grant-funded activities. The EMSC performance measures set goals that help to develop consistency across the nation within the EMS and trauma systems of care for children.

The first three measures are new pre-hospital, EMS systems-based measures focused on assuring EMS practitioners have adequate resources to serve children and can adequately use the resources. Practitioners were urged to identify a pediatric care coordinator to each EMS agency (assuring NEMSIS compliance), and were required to document the use of pediatric equipment to enhance education.

The remaining measures are hospital and permanence measures.

EMSC Performance Measure 1 Submission of NEMESIS Compliant Version 3.x- Data	Degree to which EMS agencies submit NEMESIS-compliant version 3.x data to CEMS
EMSC Performance Measure 2 Pediatric Emergency Care Coordinator (PECC)	Percentage of EMS agencies in the state that have a designated individual who coordinates pediatric emergency care
EMSC Performance Measure 3 Use of pediatric-specific equipment	Percentage of EMS agencies in the state that have a process requiring EMS providers to physically demonstrate the correct use of pediatric-specific equipment
EMSC Performance Measure 4 Hospital recognition for pediatric medical emergencies	Percentage of hospital Emergency Departments (ED) that can stabilize and/or manage pediatric medical emergencies
EMSC Performance Measure 5 Hospital recognition for pediatric trauma	Percentage of hospital Emergency Departments (ED) that can stabilize and/or manage pediatric trauma
EMSC Performance Measure 6 Inter-facility transfer guidelines	Percentage of hospital Emergency Departments (ED) in the state that have written inter-facility transfer guidelines that cover pediatric patients and include the following components of transfer: <ul style="list-style-type: none"> ○ Defined process for initiation of transfer, including the roles and responsibilities of the referring facility/center (including responsibilities for requesting transfer and communication) ○ Process for selecting the appropriate care facility ○ Process for selecting appropriately staffed transport service to match the patient's acuity level (level of care required by patient, equipment needed in transport) ○ Process for patient transfer (including obtaining informed consent) ○ Plan for transfer of patient medical record ○ Plan for transfer of copy of signed transport consent ○ Plan for transfer of patient's personal belongings ○ Plan for provision of directions to and about new facility for family
EMSC Performance Measure 7 Inter-facility transfer agreements	Percentage of hospital Emergency Departments (ED) in the state that have written

	inter-facility transfer agreements that cover pediatric patients
EMSC Performance Measure 8 Permanence of EMSC	<p>Degree to which the state has established, each year, permanence of EMSC in its EMS system, including:</p> <ul style="list-style-type: none"> • The EMSC Advisory Committee has the required number of members per the implementation manual • The EMSC Advisory Committee meets at least four times a year • Pediatric representation is incorporated on the state EMS Board • The state requires pediatric representation on the EMS Board. • One full-time EMSC Manager is dedicated solely to the EMSC Program.
EMSC Performance Measure 9 Integration of EMSC priorities into statutes or regulations	Degree to which the state has established permanence of EMSC in the state EMS system by integrating EMSC priorities into statutes or regulations

Appendix A: Ambulance Service Coordinating Advisory Board

As of December 31, 2017

<u>Member</u>	<u>Representing</u>	<u>Role</u>
John Potvin, NRP	Rhode Island State Association of Firefighters	Chair
Michael DeMello, NRP	Bristol County EMS	Vice Chair
Raymond Medeiros, AEMT-C	Rhode Island State Association of Firefighters	Secretary
James Richard, NRP	Rhode Island State Association of Firefighters	Member
Gillian Cardarelli, NRP	Providence County, Career EMS	Member
Kimberly Perrault, AEMT-C	Providence County, Volunteer EMS	Member
Jason Umbenhauer, AEMT-C	Kent County EMS	Member
Bethany Gingerella, RN, NRP	Washington County EMS	Member
Randall Watt, AEMT-C	Newport County EMS	Member
Lynne Palmisciano, MD	American Academy of Pediatrics	Member
Joseph Lauro, MD	American College of Emergency Physicians	Member
Michael Connolly, MD	American College of Surgeons	Member
Kenneth Williams, MD	Rhode Island Medical Society	Member
Carolina Roberts-Santana, MD, MHA	Rhode Island Department of Health	Member
Jason Rhodes, MPA, AEMT-C	Rhode Island Department of Health	Member
Dawn Lewis, PhD, RN, EMT	Hospital Association of Rhode Island	Member
John Pliakas, APRN, NRP	Emergency Nurses Association	Member
Andrew Pappas, NRP	Private EMS	Member
Adam Reis, RN, EMT	Private EMS	Member
Scott Partington, AEMT-C	Rhode Island Association of Fire Chiefs	Member
Kathleen Barton	Public member	Member
Tina Goncalves, Esq.	Public member	Member
Paul Casey, AEMT-C	Rhode Island House of Representatives	Member
Derek Silva, AEMT-C	Rhode Island Senate	Member
Vacant	Rhode Island State Firemen's League	Member

RHODE ISLAND DEPARTMENT OF HEALTH

Rhode Island Emergency Medical Services Information System

Electronic Patient Care Reports

RI-EMISIS

Welcome to the Rhode Island Emergency Medical Services Information System (RI-EMISIS). RI-EMISIS is the pre-hospital electronic patient care (EPCR) reporting system for the Rhode Island Department of Health, Division of Emergency Medical Services.

By statute, all licensed ambulance services are required to submit data, a patient care report for each patient transported. This requirement is established in the Rules and Regulations Related to the Emergency Medical Services for the State of Rhode Island and Providence Plantations and the Department of Health.
