

Thank you for your interest in the Health Information Technology (HIT) Survey administered to licensed independent practitioners (LIPs) in Rhode Island. These practitioners include physicians, physician assistants (PAs), and advanced practice registered nurses (APRNs).

The Practitioner Report is the ninth report about how practitioners are using computers to manage care for the patients they see and the second report to include APRNs and PAs. Increasing the use of computers in health care is supported by the Governor and others who want to improve how health care is provided in Rhode Island.

The practitioners included in this report are all licensed by the Rhode Island Department of Health. They are listed alphabetically by last name. The report includes information for three topics, or measures:

<b>Measure 1: Practitioners with electronic health records (EHRs)</b>
Practitioners with computer systems, or EHRs, that track patients' health care information (Yes or No)
<b>Measure 2: Use of E-prescribing</b>
Practitioners who send their patients' prescriptions to the pharmacy electronically, or "e-prescribe" (Yes or No)
<b>Measure 3: Use of E-prescribing for controlled substances</b>
Practitioners who send their patients' controlled substances prescriptions to the pharmacy electronically, or "e-prescribe" (Yes or No)

***Want to learn more?***

For detailed information about these measures, see the **Measure Specifications** available at:

<http://www.health.ri.gov/publications/metadata/HealthInformationTechnologySurvey.pdf>

For **Detailed Reports** on various HIT-related topics, visit:

<http://www.health.ri.gov/publications/annualreports/HealthInformationTechnologyPhysicianSurveySummary.pdf>.

If a practitioner did not respond to the survey, they are reported as not using computers to care for their patients. This means they have "No" for Measures 1, 2, and 3. If you have questions about your practitioner's use of computers to manage your health care, please ask him or her.

This report is part of the Department of Health's Healthcare Quality Reporting Program. For information about the quality of care provided by facilities (such as home health agencies, hospitals, or nursing homes), visit:

<http://www.health.ri.gov/healthcare/about/quality>.
