

# What to know before your COVID-19 vaccine appointment

Getting vaccinated is one of several things you can do to protect yourself and your household.

Before you leave for your appointment:

- **Wear a mask** and loose-fitting clothing that allows for easy access to your upper arm.
- **Bring an ID**, if you have one. This will help to verify your name and appointment. **You can still get the COVID-19 vaccine without insurance or an ID.**
- **Show up at your assigned time.** Appointments have been spaced out to avoid crowding and to ensure there is parking. If you have an appointment, there is a vaccine for you. You do not need to worry about the clinic running out.

At your vaccination appointment:

- Keep six feet of distance between you and others while inside and in lines.
- You will get a vaccination card that tells you which COVID-19 vaccine you got and the date and location of your vaccination. **If you got a vaccine that requires a second dose, bring this card to your second dose appointment.**
- If you got a vaccine that requires a second dose, you will also get instructions to make an appointment for your second dose. **We strongly encourage you to sign up for your second dose while receiving your first dose.**
- You will be watched for 15 to 30 minutes after your vaccination.

If you have made any other COVID-19 vaccine appointments (except your second dose appointment), please cancel them so other people can get vaccinated.
