If You're Fully Vaccinated

Fully vaccinated means you’ve received all recommended doses of a COVID-19 vaccine and more than 14 days have passed since your final dose.

In private places, like your home

- You can safely visit other fully vaccinated people without masks.
- You can safely visit with low-risk, unvaccinated people from one other household at a time without masks.

In public places

- Continue to wear a mask and watch your distance any time you’re near people you don’t live with.
- Continue to take part in required and optional testing at your workplace and elsewhere.
- Fully vaccinated people may not have to quarantine. Learn more at covid.ri.gov/whattodo
- If you have symptoms of COVID-19, isolate at home, call your healthcare provider, and get tested.
- If you test positive for COVID-19, you must still isolate for 10 days after your symptoms start or after your test date if you have no symptoms.
