If you're not fully vaccinated, quarantine if you've been in close contact with someone who tested positive for COVID-19. Close contact means you’ve been within 6 feet of someone with COVID-19 for a total of 15 minutes or more in a 24-hour period.

The CDC continues to endorse 14-day quarantine as the safest protocol. Learn more at www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/quarantine.html

- Close contacts who are not fully vaccinated must get tested immediately and, if the result is negative, get tested again 5 to 7 days after exposure or if symptoms develop during quarantine. Fully vaccinated close contacts must get tested 5 to 7 days after exposure and wear a mask in public indoor settings for 14 days or until they get a negative test result. Learn more at covid.ri.gov/testing
- If you're fully vaccinated against COVID-19 and have no symptoms or you've had COVID-19 in the past 90 days and have no symptoms, you do not have to quarantine. Learn more at covid.ri.gov/whattodo
- If you get symptoms of COVID-19, isolate at home, call your healthcare provider, and get a COVID-19 test.
- The Rhode Island Department of Health (RIDOH) recommends that travelers follow quarantine and testing guidance from the Centers for Disease Control and Prevention (CDC). Learn more at covid.ri.gov/travel
