You have COVID-19 symptoms and tested positive on the BinaxNOW rapid test.

Your test result will be available on portal.ri.gov/results.

Isolate right away.

- You have COVID-19 and should stay home (isolate) away from others until you are no longer contagious. Information about isolation is available at covid.ri.gov/whattodo.
- Someone from the Rhode Island Department of Health (RIDOH) will call you to give you information on how long you need to stay home and help you get things you may need to isolate safely.
- If you need a letter verifying your isolation status or test results, you can request one from RIDOH by submitting the online form at bit.ly/RIDOHletter.

Inform close contacts of your results.

If you were within 6 feet and spent more than 15 minutes with them in a 24-hour period, they must quarantine for 10 days from the date they were last with you if they are not fully vaccinated. They should go to portal.ri.gov to get tested on day 5 or later of quarantine and monitor for symptoms. Close contacts can learn more about next steps at covid.ri.gov/whattodo.

If you are 65+ or have a chronic condition and feel sick,

Rhode Island now has a doctor-recommended treatment for COVID-19 that is fast, easy, and highly effective. MABS treatment helps keep you from getting sicker and being hospitalized.

- Call your healthcare provider and let them know you have COVID-19.
- If you do not have a healthcare provider, visit covid.ri.gov/treatment to learn how you can be referred for treatment.
- Call 9-1-1 if you think you are having an emergency.

Learn more at covid.ri.gov/prevention.
You **have no COVID-19 symptoms** and tested **negative** on the BinaxNOW rapid test.

Your test result will be available on [portal.ri.gov/results](https://portal.ri.gov/results).

*If you do not have any symptoms*, it is important to know that a negative test result only means that you were not infected at this moment in time.

### What you should do now:

- Continue to take steps to protect your household, like wearing a mask, washing your hands, and getting tested regularly. Learn more at [covid.ri.gov/prevention](https://covid.ri.gov/prevention).

- A safe and effective vaccine against COVID-19 is available. Learn more at [C19Vaccine.org](https://C19Vaccine.org).

### If you start having symptoms after your test:

- Call your healthcare provider and get tested again. You can schedule a free test on [portal.ri.gov](https://portal.ri.gov).

- Stay home from work or school if you feel sick. Visit [covid.ri.gov/whattodo](https://covid.ri.gov/whattodo) to learn more.

---

**Protect your household.**

- Wear a mask
- Watch your distance
- Wash your hands

**Get tested** 5 days after there’s any chance you might have been exposed.

Learn more at [covid.ri.gov/prevention](https://covid.ri.gov/prevention).
You **have no COVID-19 symptoms** and tested **positive** on the BinaxNOW rapid test.

You **might have COVID-19**. A PCR test is recommended to confirm your results. If you leave before getting your follow-up PCR test, you can schedule one online at portal.ri.gov or by calling 401-222-8022.

PCR tests are sent to a lab. Your PCR result will be available on portal.ri.gov/results in 1 to 2 days. You will get a text or an email when your result is ready.

- **Isolate at home** while waiting for your PCR test results. Information about isolation is available at covid.ri.gov/whattodo.

- **If your PCR test is positive**, you have COVID-19 and should isolate away from others until you are no longer contagious. Someone from the Rhode Island Department of Health will call you to give you information on how long you need stay home and help you get things you may need to isolate safely. Information about what to do if you test positive is available at covid.ri.gov/whattodo.

- **If your PCR test is negative**, you do not have COVID-19. You should stay home until you have no fever for a full 24 hours without fever-reducing medication and your symptoms are improved. If you are not feeling better in a couple of days or your symptoms worsen, seek medical attention. Do not go to school or work if you feel sick.
