## Vision
Charting a path towards a healthy, equitable, and resilient Rhode Island

## Impacts
<table>
<thead>
<tr>
<th>Improved Physical Health</th>
<th>Improved Mental Health</th>
<th>Reduced Vulnerability</th>
<th>Healthier Environment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rhode Island is more resilient to the impacts of climate change and related health hazards through the use of holistic community design and planning</td>
<td></td>
<td>Climate change is recognized as a threat to human health in planning and decision making across all sectors</td>
<td></td>
</tr>
<tr>
<td>Program capacity allows for increased partnerships, coordination, and protection of public health</td>
<td></td>
<td>Evidence based interventions and adaptations are sustained and expanded</td>
<td></td>
</tr>
<tr>
<td>Vulnerable communities and individuals are aware of the risks of climate change and are more prepared</td>
<td></td>
<td>Stakeholders receive communication and education related to climate change, health, adaptation, and mitigation</td>
<td></td>
</tr>
</tbody>
</table>

## Stakeholders
- Rhode Island Residents and Communities
- Municipal and State Gov’t Agencies
- Local, Regional, and National Partners
- Educational Institutions, Non-Profits, and Businesses
- Public Health Sector

## Priorities
- Temperature Extremes
- Vector-borne Diseases
- Air Quality
- Storms & Floods
- Food & Water
- Sea Level Rise

## Interventions
- Policy & Systems Change (policy development, alignment across sectors)
- Community Engagement (enhanced communications and programs)
- Organizational Partnerships (partnership development, research collaboration)
- Individual Empowerment (educational outreach)

## Inputs & Resources
- Climate and Health Adaptation Monitoring Program (CHAMP), Alignment with RI Executive Climate Change Coordinating Council (EC4) and RIDOH Strategic Plan, Grants, Program Staff, Partners, Known Risks and Gaps, Lessons/Experience
