

**Center for Healthy Homes & Environment
Environmental Health Risk Assessment Program
Community Outreach, Education & Assessment Mini-Grant Opportunity**

The Rhode Island Department of Health (RIDOH) is offering mini-grants of up to \$4,950 each to eligible entities to support and expand upon Environmental Health Risk Assessment Program's (EHRAP's) efforts to engage with and educate communities on the impact environmental hazards have on public health.

Background:

Through EHRAP, RIDOH aims to investigate the public health implications of hazardous chemicals in the environment, educate affected communities and stakeholders about these implications, and proactively manage risks by exploring innovative solutions. Funded through the Agency for Toxic Substances and Disease Registry's (ATSDR's) Cooperative Agreement Program, EHRAP evaluates contaminated sites and analyzes potential links between site contaminants and community health outcomes.

As an ATSDR-funded program, EHRAP prioritizes abandoned hazardous waste sites included on the Environmental Protection Agency's (EPA) [National Priorities List](#), also known as Superfund sites. Additionally, EHRAP prioritizes sites with potential contaminants and related impacts on human health that are a significant cause for concern for nearby communities.

EHRAP also develops and implements the Choose Safe Places for Early Care and Education program, which supports practices to ensure early child care and education centers are located away from chemical hazards.

Opportunity and Eligibility:

RIDOH will award up to \$4,950 to each mini-grantee. Some organizations may request and receive less than the maximum mini-grant amount. Eligible applicants must be affiliated with or a part of a nonprofit, school, community-based agency, coalition, and/or grassroots organization that has a Federal Employer Identification Number or Federal Tax Identification Number. For-profit entities are not eligible.

RIDOH will fund eligible entities to conduct community outreach and education activities that amplify and complement its federally funded efforts. These efforts may be related to a specific site of concern, more generally related to health-related implications of environmental hazards in Rhode Island, or related to licensed early child care providers (either center- or home-based). RIDOH may also fund eligible entities' own site-based investigations.

Under ATSDR funding, EHRAP does not investigate or evaluate issues arising from activities that are already regulated by EPA or DEM (such as vehicles or permitted industrial pollution) and will not be able to fund projects that address these concerns through this mini-grant opportunity. However, EHRAP is able to investigate and evaluate emergencies and illegal releases occurring during the course of industrial operations.

Examples of projects eligible for funding include

- Education for community members and residents about contaminated soil at a brownfield to be remediated and turned into a community garden

- Outreach materials and social media posts targeting Cape Verdean home gardeners about the harmful effects of chemicals in urban soil and using raised beds to avoid those risks
- Developing training for Spanish-speaking family-based daycare providers on transitioning to greener cleaning supplies
- Creating educational materials for private well owners on groundwater contamination from past activities and its impact on human health

RIDOH suggests a four-month project period but welcomes alternative proposals that will enable organizations to achieve mini-grant deliverables.

Application:

Completed Community Outreach, Education & Assessment Mini-Grant Applications must be submitted electronically to Melissa Orpen-Tuz at melissa.orpentuz@health.ri.gov no later than 4 p.m. on August 11, 2023. Submissions should not exceed eight (8) pages. Applicants must score at least 60 of the 100 points to be eligible for a mini-grant.

If representatives from interested organizations have questions about this opportunity or wish to receive technical assistance in developing the proposal, they may contact Melissa Orpen-Tuz at melissa.orpentuz@health.ri.gov.

Upon award, RIDOH will provide grantees with a reporting schedule and templates to use for the mid-cycle and final reports and invoices. RIDOH requires two (2) invoices: RIDOH will require grantees submit a first invoice and mid-cycle project report midway through the agreed upon project duration and a second invoice accompanied by a final project report upon conclusion of the project timeline. RIDOH reimburses organizations after receiving program reports and invoices that demonstrate completion of work. RIDOH will not reimburse organizations for activities carried out prior to the issue date on the Purchase Order.

To apply, complete and submit the following items by the deadline and delivery methods outline above:

1. Mini-Grant Cover Form;
2. Mini-Grant Application and Proposed Budget;
3. Signed [W-9](#) to ensure timely processing.

Please note:

RIDOH requires that grantees provide a 10%-in-kind match (more details are provided in the budget section of the application).

Submit completed applications to:

Melissa Orpen-Tuz, Program Manager
Center for Healthy Homes & Environment
Rhode Island Department of Health
melissa.orpentuz@health.ri.gov

Mini-Grant Application

Important: Please provide your response either directly within this template or in a separate document that follows the template structure, ensuring the application does not exceed eight (8) pages.

Section I: Agency Capacity (10 points)

Briefly describe your organization and its experience in conducting outreach, education, and/or assessment of environmental hazards and their potential effects on public health outcomes.

Section II: Personnel (10 points)

List the personnel who will work on the project and briefly describe their experience working in this area.

Section III: Project Scope (25 points)

Please provide a summary of the proposed project and project goals, which must include a description of the types of contaminants to be addressed and their connection to negative human health impacts. Discuss how the project will support and expand upon EHRAP program goals. If you have carried out a similar project, please describe it here as well as your success in achieving the outlined goals. Describe how you will engage diverse stakeholders and community members to ensure that you reach vulnerable populations in a culturally competent, inclusive manner.

Section IV: Work Plan (30 points)

Explain your plan for completing the proposed project. Identify program activities, materials, work products, and associated timelines. Describe how you will measure project outcomes and gauge success.

Section V: Budget (25 Points)

Briefly describe your proposed expenses for this project. The maximum allowable budget is \$4,950. **Stipends, gift cards, and food and beverage are not permitted** under this funding source, however, can be used toward the 10% in-kind match.

RIDOH requires that funded entities provide a 10% in-kind match. Most organizations use cash, computer hardware, software, office supplies, salaries, space, and volunteer services for matching funds. If using volunteer services, you may use the market rate for similar work. Bureau of Labor Statistics data for Rhode Island, which can be used to determine the market rate, can be found here: https://www.bls.gov/oes/current/oes_ri.htm. Generally federal funds cannot be used as a match for another federal grant; however, there are some exceptions. If you receive federal funds from another source, you must confirm with the grantor before using these as matching funds.
