

Find the Right Lead Professional

There are a few different types of licensed lead professionals. The extent and type of work required for the project will determine what kind of lead professional you can hire. Answer the questions below to find out which lead professional is right for your project.

Is the work spot removal?

Spot removal must be areas less than 6 square feet of interior paint per room or less than 20 square feet of exterior lead-based paint. The entire work area counts towards these dimensions. You must follow **lead safe work practices**.
